RE: 1981 VEHICLE INFORMATION MANUAL

This edition of the Vehicle Information Manual is similar to those produced in previous years.

The following information can be found within this current edition:

- Sample Vehicle Identification Numbers (VIN) for the majority of 1981 cars, trucks, motorcycles and off-highway vehicles from those manufacturers who supplied information.
- Wheelbases are given for cars and trucks whenever possible.
- Breakdown of VIN for the major manufacturers to assist in determining authentic vehicle identification numbers.
- Information as to where the VIN plate can be located on many models of vehicles.
- Wheelbase conversion charts, should a customer provide the measurement in inches.
- Height and weight conversion charts to assist when issuing operator's licences.

PLEASE NOTE - The vehicle identification number information is only a sample. Any VIN accepted for registration purposes should contain the same number of alpha and numeric characters as the sample outlines.

Any time the VIN supplied by the applicant does not closely resemble the specimen in this book, the applicant should be requested to re-examine the VIN plate on the vehicle.

In the 1981 vehicle production year, many of the manufacturers have adopted the new 17 character vehicle identification numbering system, although a few have not yet converted. This new system contains an unknown "check digit" which will change with every number combination and we have represented the check digit location with an "asterisk(*)" within this book for your reference.

Some insurance companies computer systems cannot produce "Pink Cards" containing the full 17 digits and, therefore, they may not include the first two digits. These pink cards are acceptable as proof of insurance but should not be used to record VIN information on registration documents.

Do not hesitate to contact your Regional Director should you encounter any difficulty with respect to improper vehicle identification numbers or wheelbase information.

WHEELBASE CONVERSION CHART

If the wheelbase does not fall into one of these categories multiply the number of inches by 2.54 and round off the product to the nearest centimeter.

Annual Fee - April 1st - \$15.00
40% Reduction - Sept. 1st - \$9.00
75% Reduction - Jan. 1st - \$3.75
